SUMMARY

Product-focused Software Engineer with 4 years and 11 months of experience building and deploying **production-grade AI/ML and computer vision systems** using Python, .NET, and React. Proven in taking models from **training to real-time inference**, designing scalable APIs, and delivering secure, high-impact features with end-to-end ownership.

WORK EXPERIENCE

- BUSINESSNEXT(CRMNEXT) Acidaes Solutions Pvt. Ltd** | [Link](#) | **Feb 2025 – Present**
Present **Engineer** - Product AI Dept.
- CUSTOMERNEXT** [C#, React.js, SQL Server, MongoDB, PostgreSQL, Docker, Jenkins, Python, Numpy]
- Developed an intelligent **Image-to-Form Layout** service using **YOLOv11** and **Tesseract-OCR v5**, converting scanned form images into structured UI components like textboxes, dropdowns, buttons, and date pickers.
 - Trained a custom object detection model on proprietary form datasets, reducing manual form configuration time by **60%** and improving UI generation accuracy by **85%**.
 - Migrated product configuration system from **XML to JSON**, enabling dynamic environment-based configurations via Rancher, reducing deployment issues by **40%** and improving DevOps efficiency.
- GingerWebs Pvt. Ltd** | [Link](#) | **May 2021 – Feb 2025**
Software Engineer - Research and Development Dept.
- VERIFICARE** [C#, VB.NET, WPF, .NET 4.7, Entity Framework 6, SQL Server, File System, Azure]
- Optimized OMR sheet scanning to **300 sheets/min (80% speed improvement)**, reducing manual intervention by **40%** and setting a **market benchmark**.
 - Designed advanced **four-corner and reference-less OMR algorithms** and integrated **ICR with 95%+ accuracy**, improving usability by **60%** and increasing client acquisition by **30%**.
- SECURE BROWSER WITH AI API** [C#, .NET 4.7, Web API, File System, AWS Services (Lambda, S3 Bucket)]
- Built a **kiosk-mode AI-proctored browser** with full system lockdown, serving **50K+ users/year** and **10K+ candidates/month**, achieving **99.9% detection accuracy**, **75% cost reduction** and **90% higher compliance**.

PROJECTS

- LIVE-VERIFY** | [Link](#) | [Python, FastAPI, Mediapipe, NumPy, YOLOv11, Roboflow, Kaggle, Docker]
- Built a **real-time liveness verification system** to prevent spoofing via fake images/videos using facial motion and gesture analysis
 - Implemented **YOLO-based face & mask detection** to block imposters and ensure secure user authentication through containerized APIs.
- TEXTTRACT** | [Link](#) | [Python, FastAPI, NumPy, YOLOv11, Roboflow, Kaggle, Docker]
- Built an **AI-based UI extraction engine** using **YOLOv11** to detect **UI elements, text, and form structures** from images and sketches.
 - Developed a **scalable FastAPI service** for real-time extraction, automated workflows, and **Dockerized deployment**.

CERTIFICATIONS

Machine Learning - Stanford Online (Coursera) Mentor: Andrew Ng | [Link](#) | **31st January 2026**

TECHNICAL SKILLS

Programming Skills: C#, Python, JavaScript, SQL, OOPs
Frontend Technologies: React, HTML, CSS, Bootstrap, XML, WPF, WinForms
Backend Technologies: .NET Core, ASP.NET, Web API, Entity Framework, Python, FastAPI
Database & Cloud: SQLServer, MySQL, MongoDB, AWS, Azure, Jenkins, Docker, Rancher
Version Control & Tools: Git, GitHub, GitLab, Kaggle, Roboflow, huggingface

EDUCATION

Krishna Institute Of Engineering & Technology, AKTU **B.Tech (Computer Science)**
