SUMMARY

Product-focused Software Engineer with **5+ years** of experience building production-grade **AI/ML**, **computer vision**, and **LLM-powered** systems using **Python**, **.NET**, and **React**. Proven in **multi-agent** orchestration (**LangChain**), **RAG** pipelines, model training to real-time inference, scalable API design, and delivering secure, high-impact features with end-to-end ownership.

WORK EXPERIENCE

BUSINESSNEXT(CRMNEXT) Acidaes Solutions Pvt. Ltd | [Link](#) | **Feb 2025 – Present**
Senior Engineer - Product AI Dept.

CUSTOMERNEXT [**C#, React.js, Python, LangChain, RAG, Milvus, YOLOv11, Docker, Jenkins, SQL Server**]

- Built **Build With AI** - converts prompts, images, or Figma URLs into multi-page UI journeys (e.g., credit card onboarding), reducing manual configuration effort by **60–70%**.
- Designed **LangChain multi-agent orchestration** with a central orchestrator routing to specialized agents (Figma converter, image-to-layout, prompt journey builder) via tool-calling.
- Implemented **hybrid RAG pipeline** - retrieves matching journey layouts from vector store + SQL Server; falls back to two-step LLM chain (prompt enrichment → layout generation) for novel journey types.
- Trained **custom YOLOv11 model** on proprietary form datasets to detect UI controls with spatial coordinates, and integrated **Tesseract-OCR v5** for text extraction from scanned images, achieving **85%** layout accuracy.
- Integrated **configurable multi-provider LLM support** (OpenAI, Gemini, Claude, private models) with **AI guardrails** for input validation, ensuring vendor flexibility and safe outputs.

GingerWebs Pvt. Ltd | [Link](#) | **May 2021 – Feb 2025**
Software Engineer - Research and Development Dept.

VERIFICARE [**C#, VB.NET, WPF, .NET 4.7, Entity Framework 6, SQL Server, File System, Azure**]

- Optimized OMR sheet scanning to **300 sheets/min (80% speed improvement)**, reducing manual intervention by **40%** and setting a **market benchmark**.
- Designed advanced **four-corner and reference-less OMR algorithms** and integrated **ICR with 95%+ accuracy**, improving usability by **60%** and increasing client acquisition by **30%**.

SECURE BROWSER WITH AI API [**C#, .NET 4.7, Web API, File System, AWS Services (Lambda, S3 Bucket)**]

- Built a **kiosk-mode AI-proctored browser** with full system lockdown, serving **50K+ users/year** and **10K+ candidates/month**, achieving **99.9% detection accuracy**, **75% cost reduction** and **90% higher compliance**.

PROJECTS

LIVE-VERIFY | [Link](#) | [**Python, FastAPI, Mediapipe, NumPy, YOLOv11, Roboflow, Kaggle, Docker**]

- Built **real-time liveness detection** based on **mediapipe** to prevent spoofing via facial motion and gesture analysis
- Deployed **YOLOv11-based face & mask detection** with containerized FastAPI for secure authentication.

TEXTTRACT | [Link](#) | [**Python, FastAPI, NumPy, YOLOv11, Roboflow, Kaggle, Docker**]

- Built **YOLOv11-based engine** to **extract UI elements**, text, and form structures from images/sketches.
- Developed a **scalable FastAPI service** for real-time extraction, automated workflows, and **Dockerized deployment**.

CERTIFICATIONS

Machine Learning - Stanford Online (Coursera) Mentor: Andrew Ng | [Link](#) | **31st January 2026**

TECHNICAL SKILLS

Programming Languages: C#, Python, JavaScript, SQL

AI/ML & GenAI: LangChain, RAG, YOLOv11, OpenAI, Gemini, Claude API, NumPy, Hugging Face, Roboflow

Backend & APIs: .NET Core, ASP.NET, Web API, Entity Framework, FastAPI

Frontend: React, HTML, CSS, Bootstrap, WPF, WinForms

DevOps, DB & Tools: SQL Server, MongoDB, PostgreSQL, Docker, Jenkins, Rancher, AWS, Azure, Git, GitHub, GitLab

EDUCATION

Krishna Institute Of Engineering & Technology, AKTU

B.Tech (Computer Science)
